

Apple Inc. is looking for an enthusiastic Color & Vision Engineer (intern) to work on advanced technologies to improve overall display performance.

Job responsibilities include

- Conduct display optical characterization.
  - Develop algorithms meeting various performance and implementation requirements.
  - Demonstrate feasibility through simulation and analysis
  - Prototype thru collaboration with cross-functional teams
  - Evaluating merging technologies that boost the display color and perceptual performance for various usage modes.

Requirements on the candidate:

- MS or PhD in Color, Vision, Perceptual Science, Optics, Image Processing
- Solid understanding of physics/optics is a big plus
- Analytical and critical thinking
- Proactive, easy-going and good communication in English
