

## Jr. Image Scientist Internship - InVisage Technologies (Menlo Park, CA)

InVisage Technologies is offering an internship for a Jr. Image Scientist position.

They are a quantum film camera manufacturer and are looking for expertise and passion to develop compelling video and photography content.

The work would involve MatLab software development and working with RAW images and videos on Adobe type software.

You would work closely with senior engineers in the application team.

They are looking to fill the position by June at the latest. This means that perhaps graduates from last semester might be most likely available.

Point of contact is Michelle Santos, who can be contacted at [jobs@invisage.com](mailto:jobs@invisage.com).
