

Dr. Broadwater received his B.Eng. degree with double majors in Electrical Engineering and Applied Mathematics from Vanderbilt University, Nashville, TN, USA in 1994; his M.S.E.E. degree from The Georgia Institute of Technology, Atlanta, GA, USA in 1996; and his Ph.D. in Electrical Engineering from the University of Maryland, College Park, MD, USA in 2007. He is a Principal Remote Sensing Scientist and Assistant Group Supervisor for the Image Exploitation Group at The Johns Hopkins University Applied Physics Laboratory (JHU/APL) in Laurel, MD. His research centers on adaptive and semi-supervised classification methods, incorporation of physics models into pattern recognition systems, and statistical signal processing techniques for EO/IR remote sensing systems, with a focus on hyperspectral imaging.
