

Keith Sullivan is a robotist and machine learning researcher at the U.S. Naval Research Laboratory in Washington D.C. He is primarily interested in embodied machine learning with additional interests in learning from demonstration, computer vision, deep learning, and evolutionary computation. He received a B.S. degree in Mathematics from Indiana University in 1998, and the M.S. and Ph.D. degrees in Computer Science from George Mason University in 2005 and 2014 respectively. Dr. Sullivan has received funding from NSF, IJCAI, and a Karles Fellowship at NRL. He has been a reviewer for IROS, IJCAI, RO-MAN, and GECCO.
