

Amy Tabb holds degrees from Sweet Briar College (B.A. Math/Computer Science and Music), Duke University (M.A. Music), and Purdue University (M.S. and Ph.D Electrical and Computer Engineering) and currently holds the position of Research Agricultural Engineer at a US Department of Agriculture lab in Kearneysville, West Virginia. There, she has been engaged in creating systems for automation in the tree fruit industry. Her research interests are within the fields of computer vision and robotics, in particular robust three-dimensional reconstruction and reasoning in outdoor conditions.
