

Mr. Dale C. Linne von Berg is the head of the Applied Optics Branch at the US Naval Research Laboratory. His Branch focuses on Intelligence, Surveillance, and Reconnaissance (ISR) and Infrared Counter Measures (IRCM) technologies and systems. This includes the development of advanced active and passive multi-intelligence sensor systems, real-time fusion and target detection algorithms, image processing/compression techniques, and imagery exploitation stations. Prior to joining NRL in 1994, Mr. Linne von Berg worked at the Johns Hopkins Applied Physics Laboratory performing analysis on digital communication systems. He holds BS and MS degrees in Electrical Engineering from the University of Virginia and is a member of IEEE, OSA, and SPIE. He has over 75 publications/presentations on ISR related technologies, holds 2 patents, and has been awarded the Navy Superior and Meritorious Civil Service Awards and the AFCEA/US Naval Institute's Copernicus Award for C4ISR Technology.
